

Laboratory accessories

Various bottles and bottle sizes are available for transporting the sample material. The closures are also available in various designs, for needle systems and Stericap. Septum stoppers, discs and special septum multiple membranes are included in the range.

Alternative versions are also available:

- UV-resistant amber glass
- Autoclavable PP bottles
- PE bags

Laboratory accessories

A correct mounting of the multiple membrane “plain surface” is guaranteed by a mounting device. The membrane will be fit properly in a very short time.
